

9/16/2010

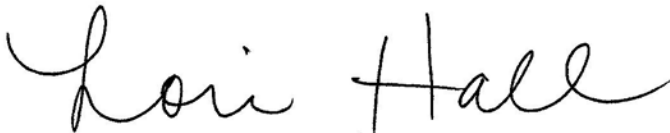

Hi Eric,

Steve and I are moved back into our newly remodeled home and couldn't be happier. Right away, We noticed a huge difference in how soft our skin felt after taking our very first shower and bath. Our whole house water system is fantastic. We are using less lotion we can't believe the difference in how wonderful and healthy our skin looks and feels.

We appreciate knowing that the water we are breathing in the steam shower is pure and healthy, without Chlorine and are confident that we made a wise investment to protect not only our health but also our new Perrin and Rowe plumbing fixtures and new glass shower doors. The decision to install our new Hague whole house water system during the process of our extensive remodel, right from the start was a good one.

In the washer, we are using less soap and our clothes smell so fresh and clean. We also feel great about cooking with pure and clean filtered water. The food tastes better and we know the health benefits are numerous. The Reverse Osmosis water is really tasty and we love our clear "designer" ice cubes from our ice machine. Everyone is drinking more water and there is no need to buy ice at the store ever again!

Thank you so much for providing us with the best possible products and service.

To Whom It May Concern:

Although I may have waited until the last day to write this letter, I have known exactly what I was going to say for weeks now. We got the Hague Water System installed and instantly we saw a huge difference. My husband and I had our house custom built for us 2 years ago. We put a lot of thought into everything, from drawing up the plans to picking out every light fixture. As excited as we were when everything was finished, there was definitely some things that we wished we would have done differently or things that we still needed. One of them was definitely a water softener. I was constantly frustrated with the dishwasher because I felt like it wasn't cleaning the dishes but really it was just hard water spots. After we got the Hague Water System installed our dishes are coming out of the dishwasher clean and clear and beautiful. My other big complaint to my husband was the ice our freezer was making. You could see all the particles floating in your glass from the ice when it melted. It was disgusting and I always made my husband buy ice if we ever had people over. This was one of the first things I mentioned during our first water test. Our ice is now clear and perfect!!

Obviously we would have been satisfied with just these changes but I am actually most grateful for the difference it has made in my daughter's skin. Our daughter is 14 months old and she had really bad eczema. Her doctor had me change her diet and take dairy out to make sure she wasn't allergic. I tried expensive lotions and body soap. I changed laundry detergents. I did everything I could think of and nothing helped. I was shocked to see that other people had written in their letters that the water system helped their skin problems. I was so excited to see that and it really made a difference in our decision making process. And I am glad we did make the right decision. Within a few days, my daughter's eczema was starting to clear up and it was completely gone within a week! It has been over a month and her skin has remained clear. We highly recommend this system. We were impressed with how quickly we saw a difference and we are so happy with the Hague Water System. Our system was installed the day after we had our first water test and both the salesman and installer were so nice and professional. We have recommended this system to our friends and we hope this letter help you make your decision too.

Sincerely,

Kristen Wallin

Re: Hague Watermax

Dear Eric:

I am writing to tell you how very happy we are with our Hague Watermax. When we moved to the area 2 years ago, I found that my skin and hair were very dry and unmanageable. Also, my clothes didn't seem to be getting as clean as they used to. We had a water softener in our new home but it just didn't seem to be doing the job.

Immediately after the installation of our Watermax we noticed the difference in several areas. My skin and hair are back to being soft and manageable. My clothes are noticeably whiter and brighter after washing. No water drops showing up on the glasses in the dishwasher. The same was true for our cars when washed. We are extremely pleased with your product and would readily recommend it to your potential customers.

Sincerely,

Susan G. Yost

Since we had the system installed we've been away from home a few times on short trips. That's when we are reminded why we purchased this system. Hard water and chlorine cause problems for hair, skin and scalp. Soap residue doesn't rinse off well in hard water, and the chlorine causes dry, itchy skin. We're always glad to get back home to our good water that's free from chlorine.

We are using a lot less soap, conditioner and moisturizers, and we have noticed a difference in the appearance and feel of clothes and towels. Fabric softeners are not needed. And there is no longer any strong chlorine smell in the shower! We also like the fact that the shower and tub are easier to clean with less soap scum and no hard water spots.

The reverse osmosis drinking water tastes great; we're no longer buying bottled water. The installer did a very good job and took the time to explain the system operation and he answered our questions. He also plumbed the RO water to the refrigerator and the ice maker. We appreciate the quality of the product and the professional service.

To Whom it may concern @ HAGUE Water:

Our experience so far with Hague water has been wonderful. We love everything about our water. It took a couple of days to feel the difference, but once we did we couldn't believe we were using "hard" water before. This water is so clear it's amazing. My skin was a big change! It was not dry any more. I really did not think that would change, but it did.

Our dishes have no more spots on them after washing in the dish washer! And the towels in the laundry are so soft. It's so nice not having to use a lot of soap. We are saving a lot of

Dear Bill,

I'm writing to tell you I'm extremely happy with my water system. I feel safer knowing my water is clean. It's so nice not to smell chlorine anymore, especially in the shower which used to make me sick.

There is no more hard water build up in the sinks and toilets. Cleaning is so much easier.

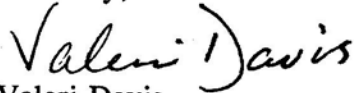

My new white clothing no longer turns gray in one washing as it did before. Everything stays white and everything dingy from the old water brightens with every wash.

The installation was done quickly and very professionally. I appreciated both.

I also love the soap products you gave me. They are the best I've ever used.

Thank you very much for everything.

Sincerely,

Dear Richard,

This is a note to thank you for all your concern and follow-up on the installation of the Hague Water System. We moved into Arroyo Grande some four months ago and immediately could tell that the water in this area was very hard. It also didn't taste very good. So...we checked into other water sources.

We had immediate service and quality information involving the reasons and benefits of installing a complete water system throughout the house. This included, but was not limited to: a good cup of coffee, soft skin, cleaner clothes from the washer and economical savings on many cleaning products. We chose the Hague system because it was more compact and designed more efficiently. We also had an excellent, knowledgeable salesperson. Yes, it's all true. We know first hand, it really makes a difference. And...the real topper came when I had my dental check up recently and the dentist said my teeth were extremely white. Other than the usual stain factors, soft water helps me keep them that way. Now that's a reason to smile about.

So many thanks for many more years of good health with the main safety factor in our lives...quality water. Sincerely,

Bill and Donna Long

Dear Richard:

As a follow-up to our agreement, I wanted to let you know how pleased we are with our Hauge system 1 month later. Since we have had water softeners in our homes the past 15 years, I really did not expect much change that what we were use to. I was pleasantly surprised to find my hair silkier after washing! All those years of frizzies!

I believe the other major difference is what we found in our laundry. As I had told you, Mark experiences rashes from most laundry detergents, and we found we could only use Arm & Hammer to prevent this problem. We cautiously tested the laundry soap provided by Hauge, and are pleased to tell you that not only has he had only 1 experience of irritation, but also the plus is that our clothes and towels appear to be much softer! I guess all that soap is finally washing out!

Thank you for your gracious service. I appreciate the commitment you have to your product, and the care you provide to us, your customer. We will continue to tell our friends about our satisfaction with our Hague system!

Sincerely,

Mark & Julie London
