Mr. Eric Foronjy
Haque Quality Water
2125 Buckskin Drive
Los Osos, CA 93402

Hello Eric,

Thanks for supplying us with our new Hague water system. Immediately upon installation, Madeleine observed a number of changes:

- She uses less hand lotion as her skin is more moist
- The water lacks any smell of chlorine
- Breathing is easier (especially upon exiting the shower)
- The amount of soap needed for various tasks is reduced

I have noted that:

- The system appears to be very efficient using very little salt
- The quality of construction is good
- This is a complete product not a set of collected bits and pieces
- The recycle time is very quick and quiet

We appreciate your flexibility in meeting our schedules and availability. We look forward to many years of enjoying our quality water system.

Regards,

Milton Davis

To Whom it may Concern,

My husband and I have lived in our home on Newport Ave. in Grover Beach for four years. Over the past year we noticed a definite decline in the quality of our water, manifested in difficult to clean water spots and etching of our glassware, water spots on our vehicles, residue in our tub and shower, bad tasting tap water, etc. We had thrown around the idea of purchasing a water treatment system, but didn't have the information necessary to make an informed decision. In the middle of January 2008, we were visited by Dan, who offered to test our water and speak with us about the benefits of a Hague Water System. My husband was immediately intrigued, but I had my reservations about both the cost and the effectiveness of such a system.

During Dan's visit, my husband and I were both very impressed with the information given to us by a very friendly and professional representative of the Hague Company. Our eyes were opened to exactly how much a water system would benefit our home and the money it would save us in the long run. I was also very impressed with the affordability of the Hague Water systems.

Since the installation of our water treatment system we have noticed the following:

- Sparkling clean dishes and glassware IMMEDIATELY after the system was installed
- A huge savings on household cleaning supplies due to the ability to use much less soap products (the amount of "suds" from a fraction of the soap is exactly like the demonstration!)
- A cleaner feeling after taking a shower or bath
- An improved taste of our tap water (no more bottled water for this family!)
- Fresher, smoother and less dry skin and hair
- A reduction in the amount of expensive shampoos and conditioners used
- No more mineral deposits on our kitchen and bathroom fixtures

In addition, my husband and I have the peace of mind that our water is free of harmful chemicals and noxious chlorine. In the past, when taking a hot shower the smell of chlorine was so prevalent that it would sometimes make me sick to my stomach; my first shower after the system was installed was the best that I've had in years! We are also looking forward to increased longevity of our appliances, including our dishwasher (which we thought we were going to have to replace only two months ago) and expensive front loader washing machine.

In the end, we would like to take this opportunity to express our gratitude to Dan and the Hague Quality Water company for their wonderful educational skills and their superior product. We are looking forward to years of wonderful water in our home!

Sincerely,

The image shows two handwritten signatures in black ink. The first signature on the left is for Sarah Williams-Richardson, and the second, larger signature on the right is for Michael Richardson. Both signatures are written in a cursive, flowing style.

Dear Richard,

My husband and I were very complimentary from the first day we met you at the Mid State fair. Of course we were skeptical of your product, like all, but wanted to see your demonstration. We joked about the demonstration process and how it would end up, but much to our surprise the "shoe water" demonstration knocked us on our asses. To this day we compare everything to "shoe water". When we see anyone drinking from their sink we turn to each other and say "I'd rather drink shoe water". We have tried to explain to people how the little machine measures minerals in the water but every single person says it's a scam and how Hague pulled a fast one on us. In reality the only people missing out are those people that are non-believers.

Ok, ok, we have soft water. Big deal, right? That's what seems to be the consensus amongst our family and friends who still think we got ripped off. Well, the joke is on them. What we got was SO much more. Soft water, clean dishes, spot free shower window, tasteless water from the RO system, chemical free showers, spot free car, money in our pockets, and smiles on our faces!

Hey, maybe we can start a Hague Quality Water "following". I'm a believer!

Thanks Richard!!

Love,

Ashleigh and Matthew Love
