Los Osos, California 93420

Dear Dan:

Not long before finding Hague Quality Water of Los Osos (Hague), we had received a water report for our area but found it incomprehensible. Of course, we were assured that our water was just fine. We had only a basic water softener but all of our drinking and cooking water was bottled. Despite the concern we had with the quality of our water, we were dragging our feet to rectify the problem. Hague caught Tania's attention at the Mid-State Fair primarily because of their gift drawing. When the follow-up call came, we were quite reluctant to schedule an appointment presuming we could not afford a system. However, the idea of testing our home water for free moved us to endure a sales pitch.

We made it clear at the start that we had strict financial limitations with three children and only Jaime's income. We truly appreciated that you heard us and worked within our expressed needs and abilities. In reality, we got to have our water test without a big sales pitch. In addition, the financial options offered to us were quite fair. Installation was very timely and the service was friendly and informative.

Now, as we shared with you, Tania has a particularly keen sense of taste and smell, and this has been our non-scientific gauge in water. Approximately four days after installation, there was a marked improvement in both the taste and smell of our water and it has only gotten better. Without hesitation, we have discontinued buying and transporting 2½-gallon jugs of water home and – we never run out! We have encountered no bumps along this road and have found ourselves just where we wanted to be: Our drinking water has no smell and it tastes clean and pure. Finally, no more bottled water!

Sincerely,

Jaime Escovar, Jr.

To Whom It May Concern:

After the purchase of our new home in San Miguel, we decided to take the next step and that was ways to protect our investment. We knew with time mineral deposits (home cancer) would take a toll on our home.

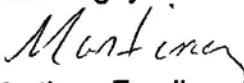

OK, several months went by and we had convinced ourselves we had no time to look into any water systems. Luckily at the California Mid State Fair your company had a booth and in passing my wife and I filled out a card and never expected to hear from anyone and of course that would be our new excuse.

2 months down the road we get a call from one of your sales reps Dan and we decided on a time when we all could meet. I have to admit, it was not Dan's charming personality that sold us the system we bought, it was his knowledge of the system's company, system and water conditions of the area we lived and clear explanation of what he was talking about. My wife and I where very comfortable and were fully understanding what was being said. He was at our home for about 3 ½ hrs demonstrating, explaining and answering questions.

Well, we are now PROUD owners of the Reverse Osmosis, Water Softening System with the Chlorine package (takes out chlorine that may cause cancer long term) and could not be happier. It helps to have a 25 year guarantee too!

We now enjoy great tasting water (have had friends compliment on how good the water taste), protecting our investments meaning appliances, water pipes and clothes and last but certainly not least, our health, no chlorine in the water! This is one bullet we are definitely glad we bit!

Thanks guys

Martinez Family

Dear Bill:

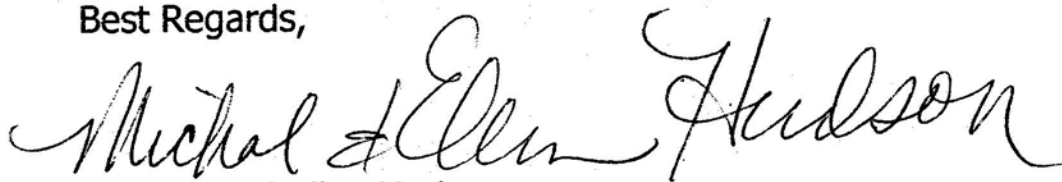

We are most delighted with our new water system and the fact that everything that you promised was delivered.

Not only was the installation painless, it was done efficiently and cheerfully and in a timely fashion. The extra faucet for car washing was installed, a tank for an ancient solar system was removed and someone besides me climbed under the house to deal with the icemaker water supply.

We really expected to be pleased with the quality of water. But we have been more than pleased. Maybe because we dealt with such lousy water for so long, the improvement in water-quality was so great as to be startling. For weeks, every clean glass from the dishwasher, every head of really clean hair, was paraded before the family.

Thank you for the great product and the wonderful service.

Best Regards,

Attn: Richard Foronjy

We want to express our thanks for the wonderful water system. Our water as you know was fairly hard and had a funny taste that I always attributed to the dead lizards in the tank along with a variety of other critters. I drink a lot of water and the R. O. system never goes dry even when Patrick fills up his huge jug to take out on the tractor all day. I also fill the animal dishes with R. O. water so they get the good stuff too.

It is so nice to go to the store and not have to haul those heavy water containers out to the car. I am really enjoying all of the other benefits of soft water too. My scalp no longer itches like crazy, my clothes look cleaner and of course bathes are really a pleasure. We love the soap products you gave us too.

I want to commend the installers on their troubleshooting abilities; they really had a job here with these thick adobe walls that go all the way to the ground. I really was worried for a bit that they wouldn't be able to run the lines and we wouldn't be able to run the electrical. But they figured it all out and were so professional and very good about explaining everything. They really are a great bunch of guys.

Thanks for everything!

Patrick and Diana Emmons

Dear Dan Middleditch,

We would like to thank you for our introduction to the Hague water company and your knowledgeable demonstration that showed the benefits and value of your water systems. We have been very happy with the products we have purchased and they do live up to every claim the company has made.

We are glad to provide this letter of recommendation to Hague and to recommend this product to any person thinking about a solution for their water needs.

Sincerely

John and Susanne Sanders
